PROFILE

Full-stack engineer who ships complete business systems solo — authentication, payments, admin dashboards, reporting and deployment. Over 20 SvelteKit applications in production, including ERP platforms with 70–90 table schemas, payroll and leave-accrual engines, granular role-based access control and audit logging. Comfortable owning what most front-end developers hand off: schema design and migrations, session security, file storage and caching, SMTP, and Linux/cPanel deployment. Native Amharic, working English.

TECHNICAL STACK

Languages	TypeScript, JavaScript, SQL, HTML/CSS, PHP
Frameworks	SvelteKit, Svelte 5 (runes), Node.js
Data	MySQL, PostgreSQL, SQLite / libSQL, Drizzle ORM & migrations
Auth & Payments	Better Auth, Argon2 + Oslo crypto, rate limiting; Stripe, Chapa (Ethiopian gateway)
UI	Tailwind CSS, shadcn-svelte, Bits UI, Superforms + Zod, Paraglide i18n (EN/AM)
Testing	Playwright (E2E), Vitest, vitest-browser-svelte
Infrastructure	cPanel / LiteSpeed, Vercel, Docker, Nginx, SMTP, GitHub Actions, SEO & Core Web Vitals

FLAGSHIP PROJECTS

Spotless System — HR, payroll & operations ERP

spotlesset.com

- Payroll engine covering salaries, bonuses, deductions, overtime, commission, pension and Ethiopian tax/VAT withholding, producing payroll runs, adjustments and receipts.
- Leave-accrual system with entitlement rules, expiry policy and a ledger, driven by a scheduled cron job; the accrual, allowance and ledger logic is unit-tested.
- Multi-stage approval and rejection workflow across contracts, payments and requests, with role-based permissions, an audit log, soft deletes and database backup.
- Nine report suites — payroll, people, money, leave, stock, commercial, compensation, analytics and system — with employee attendance by site and ID-card generation.

SvelteKit · Drizzle · MySQL · Argon2/Oslo · 90+ table schema · Vitest · Playwright

Shimeles Abera Foundation — charity management platform

shimelesaberafoundation.org

- End-to-end nonprofit operations: beneficiaries and households by region, donors, donations, recurring pledges, campaigns, payment reconciliation and disbursements.
- Volunteer lifecycle from application through skills, availability, references and placement, including a safeguarding-check workflow with credential tracking.
- In-kind donation handling with itemised records, categories and photo evidence.
- Granular RBAC — 20+ named permissions with read/write/reconcile/assign verbs and per-pillar user assignment — over a full audit log.
- Built-in CMS (pages, content blocks, navigation, blog, testimonials, media), a dynamic form builder with document uploads, and database-driven translations for multilingual delivery.

SvelteKit · Drizzle · Better Auth + magic link · 70+ table schema · Vitest

FLAGSHIP PROJECTS (continued)

TMax Electronics — e-commerce & inventory platform

tmaxelectronics.com

- Storefront with catalogue, categories, tags, discounts, token-based checkout and customer accounts with order history.
- Inventory back office tracking suppliers, price ranges, stock adjustments and damaged goods, alongside order fulfilment states and customer records.
- AI shopping assistant built on Google Gemini, plus role-based admin, blog and testimonials.

SvelteKit · Drizzle · MySQL · Better Auth · Google Gemini · Paraglide i18n

PROFESSIONAL EXPERIENCE

Several of these engagements ran concurrently.

Software Engineer — Digital Construct

- Build e-commerce platforms — storefronts, catalogue and inventory management, checkout and order fulfilment.
- Delivered a SvelteKit learning-management platform in TypeScript, covered by automated end-to-end tests with enforced pre-commit linting.

Software Engineer — EthioIQ

- Made e-learning faster and easier to use, improving the delivery and performance of the organisation's online learning platform.

Software Engineer — Wysemonk

- Developed a wide variety of websites for the company and its clients, covering front-end, back-end, deployment and hosting.

Web Developer — Mofer Technologies

- Built and maintained client websites end to end, covering both front-end and back-end work.
- Rebuilt and improved existing pages for performance and maintainability.

Web Developer — Open Flow Software

- Delivered full-stack website builds for external clients.
- Extended and refactored inherited codebases.

Web Developer — Yebehir

- Developed the front-end and back-end of the organisation's web platform on SvelteKit.
- Implemented authenticated admin tooling and content management.

Data Transfer Officer — Unilever

- Executed data migration operations between internal systems, validating accuracy and integrity of transferred records.

SVELTEKIT SITES IN PRODUCTION

tmaxelectronics.com — electronics retail
stewardoflife.org — church management
shimelesaberafoundation.org — foundation
golladesigns.com — design studio
fahemgeneraltrading.com — general trading
spotlesset.com — cleaning operations
lalobakerysolutions.com — bakery & e-commerce
dsfet.com — corporate platform
pulsedataet.com — ERP platform
mohammedlaloie.com — personal brand

EDUCATION

BSc, Software Engineering — Mar 2023

Mekelle University / Arba Minch University
